Built to withstand the punishment that only kids know how to deal out but with built in safety features that give you the reassurance that if they get out of control, YOU still have control.

The secret is the remote start and stop system. At the push of a button the machines engine can be stopped to prevent accidents and then restarted remotely when you know things are safe once more. We have a wide range of two and four wheel machines on our website. If you want to see them in the 'flesh' why not come to our open day, details on the rear of this newsletter.
